

MCH Curriculum for Students who Started Fall 2024 or Earlier

Maternal and Child Health Competencies

In addition to the standard MPH Program competencies, students in the MCH concentration will meet the following competencies:

1. Evaluate a maternal or child health problem in a defined population. (PHP2023)
2. Critically evaluate the literature on the effectiveness of programs and/or policies addressing maternal or child health. (PHP1950)
3. Concisely synthesize data from studies on barriers and facilitators to maternal or child health. (PHP1950)
4. Critique the methods used in maternal or child health research. (PHP220F)
5. Design a study of maternal or child health using appropriate research and evaluation methodologies. (PHP220F)
